

Grading & Piping Module

Available as an add-on toolset for SITEOPS

This patented technology features an array of intelligent auto-drawing tools that provide the ability to quickly create and revise complex layouts and optimize grading plans for the lowest cost of construction.

Highlights and benefits:

- Produce cost-optimized conceptual site plans and takeoff budgets within hours
- View “quick” grading plans, along with cost estimates, in seconds
- Auto-generate grading and storm water drainage plans
- Generate cut and fill estimates on the fly
- Export design files in DWG, Land XML, PDF, and COLLADA formats
- Export cost estimates in HTML and XLS formats
- Generate site cost optimization reports that include 2D and 3D site design images
