

Layout Package

Base Product - Annual License

SITEOPS[®] Layout gives civil engineers, architects, landscape architects and land developers the power to rapidly create site layouts and “what-if” scenarios, thus accelerating the design process and enabling quick conceptual designs.

Highlights and benefits:

- Dynamic auto-drawing tools to create parking lots, streets, sidewalks and many other features
- Revise site plans easily: adjust a building’s location and the software will automatically redraw parking, driveways, islands, and more
- Rapidly prototype complex site layouts in minutes with spatial templates
- Systematically consider numerous possibilities for a site within user-defined constraints
- Allow for more time to focus on creative solutions rather than tedious drafting
- Work from a known project location to completed layout in a fraction of the time required by traditional CAD
